

Partner Newsletter

Hello,

May 2009

Congratulations to Chris Hayden at Sikich for winning the April Typo contest! Each month there will be one intentional typo, and those who report it will be entered into a drawing for a \$25 gift card for Amazon*. There might be unintentional typos too, but since you will not know the difference, reporting those will also count!

Features of the Month

GP PowerPack

- Bin-to-Bin Transfer Transactions - This new module in GP PowerPack uses the Item Transfer Entry window to create and post a bin-to-bin transfer transaction, resulting in a historical record of inventory movement.
- PO Document Types - Our PO Numbering add-on has been extended to provide different PO Numbering sequences for purchase orders generated from PO Preview (SOP generated POs), PO Generator, Manufacturing Order/Purchase Order Link (Outsourcing POs), and MRP Planned Orders.

MFG PowerPack

- Lot Number Mask - extends the functionality of "serial number masks" to the definition of Lot Number formats. It also adds the ability to auto-generate both Lot and Serial Numbers from any GP transaction.

WASPLink

- Print barcode labels directly from Dynamics GP
- Supports printing labels from PO Receipts, Inventory Transactions, Item Maintenance, Item Inquiry, MO Entry, MO Receipts, and more.

Random Branch

[The Anti-Spec](#). This is supposed to be funny. If you do not find it to be hilarious, or are otherwise not impressed or are offended, please pretend you did not read it.

Lastly, this wird is speellled wrung.

* This is just for fun. There are all kinds of rules, none of which are published anywhere. We reserve the right to do anything, so don't get too picky about this. Somebody, and not our friends or family, will get an Amazon gift card each month. Actually, if you do win, it doesn't mean you are NOT our friend, just that you were picked at random.
