

## Partner Newsletter

Hello,

October 2009

Congratulations to Tom Jablonski at Vantage Business Solutions for winning the September Typo contest! Each month there will be one intentional typo, and those who report it will be entered into a drawing for a \$25 gift card for Amazon\*. There might be unintentional typos too, but since you will not know the difference, reporting those will also count!

### Features of the Month

It is the time of year when a young man's fancy turns to Inventory Control. Well, perhaps not, but it is probably a topic on the mind of many of your customers. We have several recent additions that can help make inventory control a little easier in the coming year.

#### GP PowerPack

GP PowerPack is a suite of enhancements for Dynamics GP covering virtually every part of the system. There are several updates for this month pertaining to Inventory Control:

- **Kit Transfers** - use Item Transfer Entry to transfer a kit between inventory locations.
- **Bin-to-Bin Transfers** - use Item Transfer Entry to create a bin-to-bin transfer transaction that can be saved, posted, and viewed in history.
- **Shortage Inquiry** - this window integrates into SOP Returns, PO Receipts, MO Receipts, and Inventory Transactions during posting to provide a pop-up alert of inventory requirements. If 128 SDRAM is received on a PO, Shortage Inquiry will pop-open to show which other transactions in GP require that inventory (such as Picklists, or Sales Orders).

#### Product Information

- [Advanced Preactor Integration](#)
- [Consulting Toolkit](#)
- [CompleteCount](#)
- [EDI830 Integration](#)
- [EZImport](#)
- [GP PowerPack](#)
- [Horizons Migration Tool](#)
- [LeanMFG](#)
- [MFG PowerPack](#)
- [MFG DataArchive](#)
- [WASPLink](#)

## Complete Count

CompleteCount provides a "stock tag" supported physical inventory count that integrates with the Dynamics GP Cycle Count. The Stock Tag method of counting creates a traceable record of how the physical count was tallied.

We just added a new feature to CompleteCount called **Excel Link**. Instead of using physical tags to conduct a count, CompleteCount can now create count sheets in Excel workbooks, and import the count from those Excel files.

## Alerts

The Alerts functionality has expanded greatly over the last couple of months to include pre-built alerts for nearly every master record and transaction in GP. We are excited about the new **Alert Builder** which allows you to create and attach your own custom alerts anywhere in the system.

## Random Branch

Have you ever implemented Dynamics GP in an FDA regulated environment? Are you interested in learning about Dynamics GP in biotech? If so, we have an exciting new product coming soon. Read the background on it at the link below. We hope to stimulate some exciting conversation.

Oh, almost forgot...BOO!

[Background Document](#) (the spelling error is not here...it could be, and probably is, and still counts, but this isn't the one we planned on!)

\* This is just for fun. There are all kinds of rules, none of which are published anywhere. We reserve the right to do anything, so don't get too picky about this. Somebody, and not our friends or family, will get an Amazon gift card each month. Actually, if you do win, it doesn't mean you are NOT our friend, just that you were picked at random.
